A QUIET MARRIAGE.

Mr. Earl Logan and Miss Emma Janetta Williams were quietly married last Wednesday the 12 inst. Both, though extremely popular among a goodly number of friends, agreed that there would be no wedding band for them, nor any of the usual noise and bluster. The now Mrs. Logan is one of the Senior respectable families of this city, having graduated from Lincoln High School, she added two years at the Kansas State University; being of a sweet cherry temperament one may hazard the guess that she will prove the nobler qualities of a wife. Mr. Logan, himself is one of those likeable youths that everybody has a glad heart for and has any number of attainments that go to make up a clever fellow. He is a waiter by profession and one of the very best in his line, this seems to enable him to stop, his way, a goodly portion of Uncle Sam's currency. No mean asset, you will say, in the forming of a husband. But what we are trying to convey to this pair is that their friends wish them a life of long happiness. Newly wed address now at 1518 Tracy Ave.

FARMERS BEAT HESSIAN FLY

Effective Work in Controlling This Pest Has Been Done by Co-Operation of Wheat Growers.

Missouri farmers have done effective work in controlling the hessian fly. A recent survey made by the University of Missouri College of Agriculture and the United States Department of Agriculture indicated that the co-operative work which farmers are doing has practically eliminated the fly wherever the co-operation has been thorough. Hessian fly experimental fields in Johnson, Clay, Nodaway, Carroll, Boone, Madison, St. Genevieve, Perry, Mississippi, Butler, Greene and Laclede counties were inspected. In addition several farms in each of the counties were also visited. Only in Mississippi county was the hessian fly found.

In 1915-1916 Missouri as a whole was heavily infested with fly and in some sections the wheat crop was almost completely destroyed. As a result of this damage many Missouri farmers began to practice control measures by plowing under the stubble early, just as soon as the wheat was cut, keeping down all volunteer wheat during July, August and September and seeding on or about the fly-free date. This practice resulted in a good seedbed and fewer flies, with a larger yield from the 1916-1917 crop.

This fall very little wheat was sown before the fly-free date, except in sections where an exceptionally large crop was sown and owing to the scarcity of labor the seeding had to be begun early, as was the case in Southeast Missouri, where the fly was found. However, taking the state as a whole very little damage need be expected to the 1917-18 wheat crop by the hessian fly. The acreage of wheat is from twenty-five to fifty per cent greater this year than last and the prospects for a large crop are good, provided that the winter is favorable.

TO DISCUSS MILK DELIVERY

Producers and Distributors to Hold Conference at Columbia During the Farmers' Week.

A conference of milk producers and distributors will be held during Farmers' Week at the University of Missouri, Columbia, January 14 to 18. War conditions have aggravated the problem of the milk distributors especially in the smaller towns. This will be the second market milk conference. The first was held last year. Daily lectures will be given on feeding for milk production, selection and breeding of cattle, raising calves on substitutes, and other questions of direct interest to dairymen. The increased cost of marketing milk due to shortage of labor, slaughter of cows for beef, and high cost of feed has seriously handicapped the producers of milk. The distributors are confronted with similar difficulties in supplying the demand for pure milk at a reasonable price.

The program for January 15 has been especially designed for retailers of milk. Demonstrations of market milk machinery and milk plant methods will be given. For the afternoon the following program has been arranged:

Making and Selling Cottage Cheese—A Byproduct of the Milk Plant, L. G. Rinkie, University of Missouri; Building a City Milk Delivery Business, A. H. Sheppard, White Eagle Dairy Co., Columbia, Mo.; What the Consumer Has a Right to Demand of the Milk Man, Percy Werner, Jr., University of Missouri.

To Limit Sugar Sales.

Wholesale grocers of St. Louis have been instructed by the food administration to limit their sales of sugar to 500 pounds to each retailer every ten days. Consumers will be allowed to buy but five pounds every ten days.

Missouri Quail in Danger.

Thousands of quail in counties of southern Missouri are in danger of starvation, says an appeal issued at Springfield by deputy state game wardens, in which farmers of that region are asked to put out feed for the birds. Snow a foot in depth has covered the ground for nearly a week and the quail are reported to be huddled in places of shelter from the zero temperatures, unable to stir around and reach their natural food supply.

Women to Run St. Louis Cars.

Women will fill vacancies in the ranks of street car conductors in St. Louis as fast as they occur after January 1. Present men employees are not to be discharged to make way for the women, but no more men will be hired.

D. D. Ford, 91 years old, Fulton's oldest citizen, and believed to be the oldest Mason in Missouri, both as to age and length of membership, died there recently. He joined the Masons in 1854 and for a number of years was secretary of the local lodge.

McCord to Direct Draft.

Lieut. Col. J. M. McCord has been relieved of the duties of adjutant general and has been designated as executive officer for the administration of the Selective Draft Law for the state of Missouri.

Native of Pettis County Dead. James Smiley Jenkins, born in Pettis county eighty-four years ago, is dead on his farm near Longwood, after a stroke of paralysis. He was married to Miss Kelly, a Pettis county girl, sixty-six years ago.
